# Welcome to the 2014 Ultimate Jeep Catalog!

**I**t has been almost 6 years since we last published a catalog and a great deal has changed since then, both at Portrayal Press and in the military vehicle collecting hobby.

Back in 1980, when Portrayal Press was started, the Internet was just a glimmer in Al Gore's eye, surplus vehicles were being sold by the DRMS and Dennis Spence, Portrayal Press' founder, was collecting manuals and other dirty paper on American military vehicles at flea markets and used book fairs. What started out as a favor for a few collecting buddies grew into a business that spurred Dennis to launch Military Vehicle Magazine and also help found the Military Vehicle Preservation Association. Since this modest beginning in the back of the Spence garage, Portrayal Press has accumulated a huge collection of information, Military Vehicle Magazine continues to be published under corporate ownership and the MVPA is working hard to support collectors and bring new participants into the hobby.

In 2012, with health and age-related challenges, Dennis made the personally difficult decision to close his business or find a buyer. As fate would have it, Patrick Tipton was in the process of restoring a 1943 Willys MB and happened to live very close to the world headquarters of Portrayal Press. One thing led to another and by January of 2013, Patrick became the new owner of Portrayal Press. Patrick's background is media and finance with a healthy dose of weekend wrench turning (airplanes, motorcycles, tractors, cars, trucks, etc.). He has long been a student of World War II, so Portrayal Press represented an opportunity to merge professional skills with a lifetime passion for these machines. Patrick is also fiercely proud of his country and grateful every day for the service of thousands of men and women who have and continue to protect our freedoms and the American way of life. Portrayal Press was a great personal fit.

2013 was spent trying to get a handle on the business, restock, and re-establish relationships with key vendors. With over 2,500 different titles to learn it was a genuine Matterhorn. In 2014, with a massive amount of work to do, Patrick was joined by Anthony De Lucia, an old friend who had served in the Army before going corporate to pay for his “gear head” passions including motorcycles, firearms and more. Anthony specializes in “getting things done” and has significant technical skills to boot.

*Anthony (l) and Patrick (r)  
on the Tipton Farm*

With Anthony on board, he and Patrick have continued the work of updating inventory and production and most importantly, updating the new website with an ever-increasing selection of product. They have also created an online presence through Facebook, Pinterest and Twitter and launched a YouTube Channel, where they are regularly posting videos on everything from starting a Mule for the first time in 15 years to the easiest way to rivet the front gussets on a WW2 jeep. Dennis started Portrayal Press by being at the center of information for the military vehicle hobby and Anthony and Patrick look forward to continuing this tradition.

This catalog presents what we believe to be the largest selection of books about the “Jeep” ever presented. Many of the titles are rare and hard to find out-of-print stock that Dennis purchased years ago that have sat, somewhat forgotten, in our warehouse ever since. We hope to get them in the hands of people who will truly enjoy them.

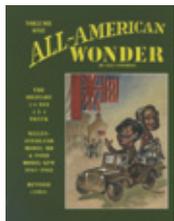

We are actively working on a new catalog for the remaining Portrayal Press titles that we hope to have out by the end of the year. In addition, we have several new books coming out in the coming months.

We hope you enjoy the catalog. If you are an Internet user, we encourage you to “like” our Facebook page and subscribe to our YouTube channel in addition to visiting us at [www.portrayalpress.com](http://www.portrayalpress.com). We have lots of great information to share with your over the coming months and years.

*Thank you for your patronage.*
